

PocketBook

Release Notes

Touch HD 3

FW Version	5.19.504
Localization	WW

November 7, 2018

Firmware: 5.19.504 (November 7, 2018)

Updates:

1. Improved stability of the *Bluetooth* connection with other devices.
2. Enhancements regarding the *AVRCP* protocol implementation:
 - possibility to transfer information such as the playback position of the current track as well as the track title, artist, genre or album to the connected *Bluetooth* device;
 - possibility to control the switching between tracks from another device.
3. Possibility to adjust the volume between the frequency range zones using the integrated equalizer.
4. Possibility to set the hardware buttons to switch between audio tracks in the *Music Player* app.
5. Enhancement of the download mechanism of the *Browser* app to read web pages offline.
6. Updating of *Browser* app.

Fixed:

1. Possible incorrect display of the system clock after resuming from sleep mode.
2. Incorrect display of some book titles containing Chinese etc. characters in the *Library* app.
3. Possible delays when switching between tracks in the *Music Player* app.
4. Other minor fixes.
