

PB602-PB903**Release Notes 2.0.5****Implemented****Localization**

1. Localization files of the interface are added in languages:

- Finnish (FI)
- Holland (NL)
- Romanian (RO).

2. Registration and license agreement texts are added in languages:

- Ukrainian (UA)
- Bulgaria (BG)
- Finnish (FI)
- Hebrew (HE)
- Italian (IT)
- Portugal (PT)
- Polish (PL).

Communications

1. Implemented the automatic firmware update via Internet. To start the update select Configuration > Maintenance > Software update. After starting the device checks updates on the SD card and internal memory, then it tries to connect to the server with a request to update the software.

2. Icon which indicates the 3G connection is added to the list of available networks.

3. Realized the function: "Display characters" while entering the password (for example, the access key for the Wi-Fi connection).

4. Separate displaying of Wi-Fi and Bluetooth MAC addresses in section "About device".

5. Displaying the IMEI number for PB603, PB903 in section "About device"

6. Added ability to explicitly disconnect the Internet connection. To do this, open: **Connectivity> Access to network> "Off"**. The system will close all active connections WIFI, BT, and 3G.

Readers

1. Option to activate warning message about opening a large file is added (Configuration > Appearance > Message: on / off).
2. The function "Edit Picture" is added in FB Reader.

Settings

1. While cleaning state, additionally will be reset "key mapping" and customized profiles of Internet access.
2. The "Boot logo" and "Power-off logo" at screen saver can now be displayed in 16 shades of gray.
3. In the landscape orientation in the 602, 603 now there is an opportunity to scroll through text: **Configuration > About device > More...**

Applications

1. When you update the RSS-feed the downloading status will be displayed (the message appears "Loading news..")
2. RSS feeds are saved with the extension .hrss and opened by new application **links** (a browser for RSS feeds).
3. To read more RSS-news is now possible in the browser, not closing it (by clicking on the link in the header).
4. The calculator is enhanced. In the widget you can use a simple calculator with the ability to switch to full screen engineering calculator.

Fixed

Communications

1. In previous versions, the device sometimes could not find other Bluetooth devices.
2. Fixed the problem of renaming the network device name (in Bluetooth settings tab).
3. The computer will not be connected to the device after connecting device via USB cable, until "PC connection" is selected.
4. Text message, when 3G connection is disabled, is fixed.
5. Text message, when you change 3G card PIN-code, is fixed.
6. While disconnecting the power cable (or USB), the charging indicator correctly switches to the battery indicator.
7. Wrong name of the device in the system notifications while determining it on PC is corrected. (Instead of the inscription "**File-backet Storage Gadget**" device is called according to its type).

8. Devices with this version can be connected to Wi-Fi networks with hidden SSID.

9. When the Wi-Fi connection is on, the MAC address of the device is displayed.

Settings

1. If you rename the book, the title of the previous book will not be copied.

2. While updating firmware, it is possible to use the charger as a power source.

3. Battery charge level icon correctly displays battery charge status.

4. In previous versions, after pressing the buttons, crackling from the speakers could be heard.

5. After turning off / on the device, the settings of the widget: "Last open book"(view: list, thumbnails) will be saved.

6. In previous versions, "Opened book" icon in the library disappeared after using the shortcut menu (type: sketches, detailed).

7. Widget Settings are saved when you change the appearance of the main menu.

8. Reduced radius of curvature in the framework.

Applications

1. In the application PocketNews - after using the function of moving cursor to the beginning of the line (long press on "left" button) empty symbols will not be printed any more. There is no need to recreate the RSS-feed.

2. If you exit RSS file, the application Pocket News will be opened. (previously, such exit caused main menu opening).

3. Folder «**Screens**» in the "**Photo**" section appears immediately after the first screenshot.

Readers

1. Fixed incorrect exit without saving after editing a note, when the notes are saved as an image.

2. Now there is a possibility to turn pages of the book, when the dictionary is opened.
