Localization	WW

November 23, 2017

Firmware 5.17.964 (November 23, 2017)

Updates:

READER PROGRAM

1. Book opening speed increased.
2. Password-protected *PDF* support.
3. Improving the hyphenation dictionaries.

OTHER IMPROVEMENTS:

1. Power consumption optimization.
2. Optimization of device boot process, providing shorter boot time of device after switching-on.
3. Rework of Settings app items list, hiding unneeded system files from *Library* app.
4. Tagging loaned books by a certain label in *Library* and *Desktop* applications, ability to return borrowed books by a corresponding item in context menu in *Library* app.
5. Slovenian localization added.

Fixed:

1. Possible underling of the whole page when clicking on internal link in *epub*-formatted book.
2. Possible reading position lost when reading book from external *sd*-card of certain types.
3. Possible paging buttons events lost while flipping pages in Reader program.
4. Possible indent absence in *FB2* formatted books.
5. Inability to open some *Adobe DRM* protected book
6. Other minor fixes.
