

PocketBook

Release Notes

PocketBook Touch

FW Version 4.4
Localization EU
Developed by Obreey Products

December, 13 2013

Implemented:

1. New service '*Send-to-PocketBook*' — the ability to send books to your device using the email message with attached file(s), book(s).
2. New service '*Dropbox PocketBook*', which allows to download files, added to Dropbox, onto the PocketBook device, and to upload books from the Device to the Dropbox server, to sync information about added and deleted books.
3. Redesigned the '*Settings*' interface and the interface of Wi-Fi connections.
4. Improved work with footnotes (links) in EPUB, PDF documents.
5. New design of «*go to page*» in the reading mode.
6. Selection of the current chapter in the book's contents.
7. Increased speed of opening EPUB books.
8. The ability to create a new account in the application «*Book Store*».
9. Development of the '*Browser*' application.
10. Optimized work of the «*Library*» application to be able to operate with a large number of books.
11. The ability to read password-protected PDF documents.
12. The ability to edit the RSS feed name.

Fixed:

1. After creation of a new profile, opened PDF books were displayed incorrectly in '*Recent Events*'.
2. When commenting on the selected text in AdobeViewer, a label appeared on the line above the lower limit of the selected text.
3. Inability to work with some RSS feeds.
4. Inability to change a font in some EPUB documents.
