

PocketBook

Release Notes

Touch Lux 4

FW Version
Localization

6.3.569
WW

March 11, 2021

Firmware: 6.3.569 (March 11, 2021)

Reading Program

1. Ability to save brightness, contrast and gamma correction settings in PDF- and DjVu-formatted documents.
2. Enhancements regarding hyphenation in EPUB- and FB2-formatted books in German language.
3. Fixed the problem that the current page couldn't be set as a boot logo.

Other Improvements

1. Fixed the problem of some missing graphical elements in the notification panel of some devices.
2. Other minor bug fixes .

Firmware: 6.3.499 (February 25, 2021)

Core Changes

1. Performance improvements.
2. Quicker device boot process.
3. Optimization of the zoom and scaling procedures for images and illustrations.
4. Scroll improvements in all applications.

5. Quicker rendering of book covers.
6. Quicker rendering of PDF pages.

Reading Program

1. The speed and the quality of the processing of EPUB books increased significantly.
2. Support of LCP DRM protected files.
3. Ability to adjust brightness, contrast and gamma-correction for PDF- and DjVu-formatted books.
4. New UI controls to adjust the font of vocabulary entries when reading in the dictionary mode.
5. Exception handling during the rendering of PDF books prevents possible mistakes while opening the PDF file and provides a better experience of reading documents in this format.
6. Enhancements regarding hyphenation in EPUB-formatted books.
7. UI design enhancements of the Notes functionality, ability to add comments by tapping on the text in the notes mode, ability to change pencil thickness.
8. More smooth pinch-to-zoom gesture handling while document scaling for PDF and DjVu books.
9. Date of the notes creation added in the list of notes.
10. Fixed the problem of possibly not using some built-in fonts in EPUB-formatted books.
11. Fixed the problem of possible incorrect paragraph indents in DOCX-formatted books.
12. Fixed the problem of incorrect forming of the table of contents of certain comic books (CBR and CBZ format).
13. Fixed the problem of not displaying the table of contents in DRM-protected books.

14. Fixed the problem that the dictionary mode could not be launched if this function was assigned to a certain key in the key mapping.
15. Fixed the problem of the absence of page numbering in FB2-formatted books if the built-in page numbering was turned off.
16. Fixed the problem that some password-protected PDF files could not be opened even if the correct password was used.
17. Fixed the problem that some fonts embedded into epub files were not used.
18. Fixed the problem that some EPUB-formatted books were opened with the Roboto font instead of the default font in case the book contained embedded fonts which were specified only by the font family without a font name or specified by a font name which doesn't exist.
19. Fixed the problem that bold, italic and bold italic formatted text was not displayed properly in some EPUB-formatted books.
20. Fixed the problem that bookmarks were inaccurately set one page before or after the page intended.
21. Fixed the problem that the book may have been opened one page before the position the reader stopped reading before closing.
22. Fixed the problem that books might automatically flip one page back after stopping reading with dictionary mode.
23. Fixed the problem that some EPUB-formatted books were displayed in columns.
24. Fixed the problem that one press of the «next» button or a «tap» gesture may have caused the flipping of two pages at once.
25. Fixed the problem that a word couldn't be edited in the dictionary menu during reading.
26. Fixed the problem that the borders of highlighted text in EPUB-formatted files may not have been editable.

27. Fixed the problem that some EPUB-formatted books had a blank page after the book cover.
28. Fixed the problem that the content was empty in some EPUB3-formatted books.
29. Fixed the problem that the content had 0 as a page number in some EPUB3-formatted books.
30. Fixed the problem that the reading program might close when switching between chapters in a book's content menu or when navigating to a page.
31. Fixed the problem that illustrations were displayed incorrectly after changing the contrast or brightness in EPUB- or FB2-formatted books.
32. Fixed the problem of a possible offset between the page number mentioned in the table of contents and the actual page of a book chapter after navigating to it in EPUB-formatted books.
33. Fixed the problem that a book cover could be splitted into pages in some EPUB-formatted books.
34. Fixed the problem that bookmarks couldn't be set on some pages of certain books.
35. Fixed the problem that hyphenated words were not correctly underlined or highlighted.
36. Fixed the problem that some books flipped several pages back after re-opening.

Book Store App

1. Series support provides the ability to buy the book series in the Shop app quickly and conveniently.
2. Unser payments system support (credit card & immediate bank transfer).
3. Some wording improvements for German language.

4. Fixed the problem that the «Book of the Day» or the «Book of the Week» was not changed although it had already been changed on the web server.
5. Fixing the problem that some audio file samples can't be preloaded.

Library App

1. Fixed the problem of incorrect sorting by authors for certain books.

Notes App

1. Improved UI for notes export functionality.

Browser App

1. Ability to set the home page allowing the user to automatically load the desired page without wasting time typing its address.

Other Improvements

1. Ability to remove multiple pictures in one action from the Gallery application.
2. Smoother drawing in pencil notes and in the Scribble app.
3. Performance improvements, more quick response on touch panel gestures.
4. Translations improvements for Belorussian, Czech, Polish, Latvian and Lithuanian languages.

5. Fixed the problem that the touchscreen was incorrectly calibrated after reactivating the device from sleep mode.
6. Fixed the problem of possible «long tap» gestures stop working.
7. Fixed the problem that the control panel could be opened by clicking on the menu button while it was mapped to the task manager in the settings.
8. Fixed the problem of possible ghosting effects if the Power-off Logo was set to Book Cover.
9. Other minor bug fixes.
