Release Notes

PocketBook Touch Lux 5

FW Version	6.4.371
Localization	WW

July 07, 2021

PocketBook

Firmware: 6.4.371 (July 07, 2021)

Core changes

1. New, more convenient and functional keyboard UI with new character layouts. Several characters can be assigned to each keyboard key, which are available with a long press. Ability to switch on hints for additional characters assigned to each keyboard key in Settings.

2. Support of Chinese pinyin input (Simplified and Traditional inputs).

3. The ability to adjust frontlight brightness and temperature more precisely.

4. The ability to download preinstalled dictionaries if they were deleted for some reason.

5. UI improvements of the Calendar app.

6. Support of non-TTF fonts. From now on, users can add not only TTF fonts but also OTF and TTC fonts to the device.

7. Some performance improvements in UI of the Reading program.

8. Fixed the problem of a possibly incorrect order of notes while exporting them to an HTML file.

Reading Program

1. RTF format files to open much faster.

2. The ability to quickly restore the «fit to page» or «fit to width» mode after changing the scale in PDF- and DjVu-formatted books by «pinch-to-zoom» gesture. Right after changing the scale, the icon «return to fit previously selected scale» appears to quickly restore this mode.

3. Fixed the problem of displaying illustrations incorrectly in some books in FB2 format.
