# Touch HD 3

FW Version  
Localization

6.1.900  
WW

October 01, 2020

## Firmware: 6.1.900 (October 01, 2020)

### Reading Program

1. Enhancements regarding hyphenation in EPUB-formatted books.
2. UI design enhancements of the Notes functionality, ability to add comments by tapping on the text in the notes mode, ability to change pencil thickness.
3. More smooth pinch-to-zoom gesture handling while document scaling for PDF and DjVu books.
4. Date of the notes creation added in the list of notes.
5. Fixed the problem that some fonts embedded into epub files were not used.
6. Fixed the problem that some EPUB-formatted books were opened with the Roboto font instead of the default font in case the book contained embedded fonts which were specified only by the font family without a font name or specified by a font name which doesn't exist.
7. Fixed the problem that bold, italic and bold italic formatted text was not displayed properly in some EPUB-formatted books.
8. Fixed the problem that bookmarks were inaccurately set one page before or after the page intended.
9. Fixed the problem that the book may have been opened one page before the position the reader stopped reading before closing.
10. Fixed the problem that books might automatically flip one page back after stopping reading with dictionary mode.
11. Fixed the problem that some EPUB-formatted books were displayed in columns.
12. Fixed the problem that one press of the «next» button or a «tap» gesture may have caused the flipping of two pages at once.

13. Fixed the problem that a word couldn't be edited in the dictionary menu during reading.
14. Fixed the problem that the borders of highlighted text in EPUB-formatted files may not have been editable.
15. Fixed the problem that some EPUB-formatted books had a blank page after the book cover.
16. Fixed the problem that the content was empty in some EPUB3-formatted books.
17. Fixed the problem that the content had 0 as a page number in some EPUB3-formatted books.
18. Fixed the problem that the reading program might close when switching between chapters in a book's content menu or when navigating to a page.
19. Fixed the problem that illustrations were displayed incorrectly after changing the contrast or brightness in EPUB- or FB2-formatted books.
20. Fixed the problem of a possible offset between the page number mentioned in the table of contents and the actual page of a book chapter after navigating to it in EPUB-formatted books.
21. Fixed the problem that a book cover could be splitted into pages in some EPUB-formatted books.
22. Fixed the problem that bookmarks couldn't be set on some pages of certain books.
23. Fixed the problem that hyphenated words were not correctly underlined or highlighted.
24. Fixed the problem that some books flipped several pages back after re-opening.

## **Book Store App**

1. Some wording improvements for German language.
2. Fixed the problem that the «Book of the Day» or the «Book of the Week» was not changed although it had already been changed on the web server.

3. Fixing the problem that some audio file samples can't be preloaded.

## Notes App

1. Improved UI for notes export functionality.

## Browser App

1. Ability to set the home page allowing the user to automatically load the desired page without wasting time typing its address.

## Other Improvements

1. Ability to remove multiple pictures in one action from the Gallery application.
2. Smoother drawing in pencil notes and in the Scribble app.
3. Performance improvements, more quick response on touch panel gestures.
4. Translations improvements for Belorussian, Latvian, Lithuanian, Czech and Polish languages.
5. Fixed the problem that the touchscreen was incorrectly calibrated after reactivating the device from sleep mode.
6. Fixed the problem of possible «long tap» gestures stop working.
7. Fixed the problem that the g-sensor was switched on after restarting the device, although it had been switched off in the settings beforehand.
8. Fixed the problem that the LED indicator stopped lighting with delay after the device charging process had finished.

9. Fixed the problem that the control panel could be opened by clicking on the menu button while it was mapped to the task manager in the settings.

10. Other minor bug fixes.
