PocketBook

Release Notes

Verse Pro

PocketBook

Firmware: 6.8.4177 (September 27, 2024)

- P. 2 -

Core changes

1. Support of the new version of the LCP DRM, profile 2.x.

2. More accurate battery level display.

3. Smoother display of gradient transitions in black-and-white images in the Gallery app.

Other improvements

1. Resolved an issue that could cause some Bluetooth headsets to disconnect during music playback.

2. Fixed an issue where the amount of free space in the device's internal memory could decrease when opening new books due to excessive data caching.

3. Translations improvements.

PocketBook

Firmware: 6.8.3796 (July 05, 2024)

- P. 3 -

Reading program

1. Fixed an issue that may have caused some parts of text to be missed in some books in EPUB format.

Other improvements

1. The issue that caused some wired USB Type-C headsets with digital output to be unsupported by the device has been resolved.

2. FLAC audio format support.

3. The Ukrainian TTS voice is now available for download and installation.

PocketBook

Firmware: 6.8.3339 (March 28, 2024)

Core changes

1. Support of the new Dropbox authorization schema.

Reading program

1. Fixed a problem that could cause incorrect adjustment of contrast, brightness, and saturation of the page in some PDF format books.

2. Addressed an issue that could have prevented the underlining of text strings while creating notes in some EPUB format books.

3. Fixed the problem that some books in CBZ format were displayed without covers in Library application.

4. Resolved the issue of possible inverted illustrations in some books of CBZ format when Dark mode is enabled.

5. Fixed the problem that for some epub files the current reading page was not saved when closing a book.

6. Fixed an issue that may have prevented covers of some books in epub format from being displayed on the device's Main Menu

7. Fixed an issue that could cause not accurate selection of words in epub-format books when creating highlightin notes mode.

Library app

1. Fixed a problem that might have prevented scrolling through the list of pictures in the popup window using hardware buttons while adding pictures to a playlist in the Photo Frame application.

PocketBook

Browser app

1. Added functionality of informing the website about the current color scheme, depending on whether Dark mode is enabled or not in the Browser application.

2. Added functionality to invert the current web page when Dark mode is enabled in the Browser application.

3. Fixed an issue that may have caused some ghosting to remain when moving a slider while editing an address bar in the Browser application.

Other improvements

1. Fixed an issue that may have caused some third-party dictionaries in .dic format not to work on device.

2. Fixed an issue that could cause the absence of Adobe activation in device Settings when activating the device in the ADE application.

3. Fixed a problem that could cause an incorrect search in the Library if special characters are present in the search word.

4. Fixed an issue that displayed the author's name incorrectly in some audiobooks.

5. Some wording improvements.
