PocketBook® Era

FW Version	6.7.775
Localization	WW

July 27, 2022

PocketBook

Firmware: 6.7.775 (July 27, 2022)

- P. 2 -

Core changes

1. Better sound of built-in audio speaker as well as connected audio devices. Update of audio codecs used in firmware (AptX, LDAC, AAC, SBC). Support of the most up-to-date audio files.

2. A newly downloaded and installed TTS packet will now be chosen automatically.

3. A separate section for reading gesture settings with voice text playback (TTS) enabled has been added.

Reading program

1. Fixed the problem of the incorrect display of the font size in some books in PDF format in reflow mode.

2. Added the ability to the reading settings to enable the display of the page boundary (dotted line) that was displayed on the previous screen for books in PDF and DjVu format.

3. Added tips for user interface elements when reading in the dictionary mode.

4. Added the ability to change the speed of text synthesis by voice (TTS) with a gesture while reading.

5. More correct parsing of author, publisher, series and annotation metadata of comic books in CBZ format.

6. Improvement of the user interface for lists of content and notes. Now it is more convenient to collapse or expand the list of notes. In order to open the book page with the note, the user only needs to tap on the arrow next to the page number.

Other improvements

1. Some wording improvements for German language.
