# PocketBook Cloud

**PocketBook Cloud** functionality provides customers with several notable features:

- Keeps user's eBooks in one safe place: use this feature to be sure your book is secure.
- Automatically synchronizing of Reading positions, Collections and Favorites to all of the platforms where a user can read book: Android, iOS and the Web.

Now one can easily access the downloaded book from any device on each platform and continue reading from the point where one left off.

This functionality is currently available only for customers of PocketBook partners' bookstores.

The list of stores can be found here: <https://cloud.pocketbook.digital/browser/#/find-store>

## Implemented:

### Readers:

1. Processing of the PDF-formatted books was improved. Now the PDF files that contain loads of illustrations can be opened and flipped more quickly.
2. Supporting more than one Adobe ID.
3. Automatic Adobe ID registration makes the completion of DRM-protected books easy.
4. More comfortable work with DRM content:
  - DRM-protected book download process displayed on *acsm-link*;
  - Book is opened once the *acsm file* processing is complete;
  - Additional question windows are removed;
  - *Acsm file* is removed from the device once DRM-protected book is opened.

### Library:

1. Library performance was enhanced in order to work more efficiently with a large number of books.
2. *Favorites* is a particular option for a book now. It is no longer a one of the Bookshelves (now Collections) option.
3. Sorting by file name in "By Folders" grouping added.
4. Sorting by series number in "Series" grouping added.

## Network and synchronization:

1. Dropbox updated authentication support added.
2. Synchronization process is now displayed on the *Status bar*.
3. Ability to connect to Wi-Fi networks which contain apostrophe symbol in their name or password.

## Other:

1. Browser optimization.
2. Added hyphenation dictionaries for Polish, Bulgarian and Norwegian languages.
3. Devices performance optimization.
4. Power consumption optimization.

## Fixed:

1. Extra updates in the Library application.
2. In some cases, displaying incorrect date of the book opening using *Sorting by date* in the Library.
3. Sometimes, incorrect displaying Italic font in .epub books.
4. Possible DjVu reader crash when flipping back some books.
5. Occasional misrecognition of Paging gesture in .pdf books.
6. In some case possible incorrect pinch-to-zoom gesture handling in DjVu-formatted books.
7. Occasional premature page flipping while reading books via TTS service.
8. Some other minor bug fixes.
