

# PocketBook

## Release Notes

# InkPad Lite

FW Version  
Localization

6.5.2897  
WW

July 20, 2022

## Firmware: 6.5.2897 (July 20, 2022)

### Core changes

1. With this firmware update much more dictionaries are available for download in the «Select dictionaries» dialog of the Dictionary app and in the Reading app with dictionary mode on.
2. Support of AZW- and AZW3-formatted books.
3. New sleep logo.
4. More easy Device Setup Wizard, which starts when the device is first turned on or after factory reset. Authorization to the book shop now automatically provides authorization to the PocketBook Cloud service. Now it is possible to agree with all the terms of use of the Book Store app and the PocketBook Cloud service in one click.
5. The user now has the option to purchase a book after downloading and reading its reading sample from the Book Store. There is also an option to buy a book by selecting a corresponding item of the context menu on the cover of the rating fragment in the main menu of the device and in the Library app.
6. Periodical reminder for the user to configure Wi-Fi if the device does not have a configured network connection. This is important because it allows access to various network services like PocketBook Cloud, Send-to-PocketBook, periodic firmware updates, the Bookstore on the device and other functionalities.
7. Armenian, Azerbaijani, Belarusian, Georgian, Kazakh and Ukrainian languages were added to the list of possible languages of interface.

### Reading Program

1. Quicker processing of PDF-formatted books, fixed the problems which could cause device freezing while rendering new pages of heavy scanned book pages in PDF format.
2. A new faster engine for the Reflow mode that supports up-to-date PDF book formatting («Quick» based on Pdfium) for working with PDF files.

## PocketBook Cloud

1. The user has now the option to enable or disable the automatic uploading of books in the PocketBook Cloud on opening the book.

## Firmware: 6.5.1932 (March 04, 2022)

### Core changes

1. Support of OTG (USB On-The-Go) devices. Now it is possible to connect flash memory, card readers and so on using an USB OTG cable.
2. Faster device loading after switching on.
3. Adding books from the Wish List of the Book Store to the Main Menu.
4. Fixed a problem that caused a Dropbox synchronization failure in some cases.

### Book Store app

1. More various recommendations of shop books on the main menu of the device.
2. More convenient navigation on book lists.
3. Ability to buy books from a wish list.

### Reading program

1. More fast opening of List of Contents and List of notes of books.
2. Fixed the problems that (1) the covers of some books in Mobi format were not displayed and (2) the section headers of books in the same format were not displayed correctly.
3. Faster opening of comic book files (CBR and CBZ format).
4. Fixed a problem that caused the device to hang when displaying pages of a book with large illustrations.

5. Fixed possible formatting issues with e-books in EPUB3 format.
6. Fixed an issue where a long tap on the text in an e-book would not accurately highlight some words.

## **Library app improvements**

1. Faster search for books, start search as user types in the search line.
2. Ability to start synchronization with Send-to-PocketBook by clicking on the icon in the upper right corner of the Library in the folder of this service.
3. New icons for switching views.

## **Other improvements**

1. Ability to customize color brightness and temperature separately for Photoframe mode.
2. Automatically switching to lowercase mode after entering the upper case letter on the screen keyboard. Ability to enable CAPS mode on the screen keyboard by double pressing the Shift button.
3. More convenient text movement in the Scribble app.

## **Firmware: 6.5.866 (October 25, 2021)**

### **Reading program**

1. Faster scrolling of PDF- and DjVu-formatted books.
2. More precise swipe gesture detection which is used for paging books.
3. Added possibility to return to the page that was open before calling up the search menu in the text.
4. Automatic exit from the footnote mode after five pages.
5. Faster opening of the Book Info menu.
6. Removed the extra flashing of the screen after calling up the context menu that is displayed when text is selected while reading.

### **Library app**

1. More correct sorting of books by name, file name and series in case their metadata contain numbers (numerological order instead of lexicographic).
2. The search function now already works automatically while typing.
3. Added the Sync icon to the Send To folder to quickly resync with the Send-to-PocketBook service directly from the Library app.
4. Fixed the problem of the incorrect display of some characters in book names in Czech, Georgian and Hebrew.

## Other improvements

1. Automatic closure of the USB exchange window when the drive of the device was correctly ejected from the host OS.
2. Added the ability to move cards to the top right by double-click in the Klondike app.
3. Faster processing of adding and deleting books via the Main Menu or in the Library in case the Library already contains a huge amount of books.
4. Fixed an issue with the Sleep Cover function that sometimes occurred when closing the cover of the device while turning it off.
5. UI enhancements of the Onleihe app.
6. Fixed the problem that the automatic synchronization with the Dropbox service was not switched off when the corresponding option was disabled in the Settings.
7. Wording enhancements.
8. Other minor bug fixes.
